

## More Updates from Haiti!

**The UN Clearing the Area of Debris**

**The UN Getting Ready for the Day**

**More Injured Arrive at the Clinic**

**UN Tanks Getting Ready to Go Reach Out to Smaller Villages**

Here are some Friday Morning Up-dates from Joy .....Yesterday there were two large aftershocks again sending people to the ground!

Pastor Antoine was carrying a large bucket of water and when the ground shook he fell flat on his back and the water spilled all over him. He said that most people are staying strong but many are suicidal and don't see any hope to live anymore.

Last night no one slept well because there were 3 aftershocks during the night but the people in Neply were still up and having a prayer service at 4:00 am as they have been every morning!!

They know that GOD is all they have to hang onto right now and they are seeking Him day and night.

Pastor Antoine told me (Joy) that yesterday over 200 people from the Leogane area were rescued by the US Marines and brought to our clinic and are being treated. Pastor Antoine said that the smell is so bad in Nepley from all the wounded people they are finding who have severe infections. Today they expect that if they keep locating more wounded people from the Leogane area we could have another 200 brought to Nepley by the end of the day. We are so thankful that we are able to have a place for the UN to work from and that our Haitian staff can offer assistance.

Today temporary shelters made of plastic tarps are being set up in our villages and surrounding areas.

We appreciate your prayers and continued donations!!!
